uninsured

1,800

The number of scope-of-practice-related bills proposed in the U.S. between January 2011 and December 2012, of which almost 350 were adopted
—November issue of Health Affairs (citing National Conference of State Legislatures)

1,925

The number of malaria cases reported in the U.S. in 2011, the highest number since 1971
—Centers for Disease Control and Prevention's Morbidity and Mortality Weekly Report released Oct. 31

20%

The percentage of all nursing assistants, home health aides and personal-care aides in the U.S. who are foreign born
—Pew Research Center

17 million

The number of uninsured Americans and people with individual coverage who may be eligible for federal premium tax credits to buy health insurance in 2014
—Kaiser Family Foundation

7,000

The number of Greek doctors the Turkish health minister wants to import to help alleviate a shortage of health professionals in his country
—International Business Times

* Enrollment statistics so far are extremely spotty. The tally represents the District of Columbia and nine states running their own exchanges. It does not include any figures for the 36 states enrolling residents through exchanges operated by HHS via the troubled HealthCare.gov portal. States that declined to disaggregate numbers for private plans from Medicaid enrollment are omitted.
