

Enrollment Obameter

A weekly update tracking the enrollment in private health plans sold on the Affordable Care Act's insurance exchanges

* The tally reflects the most current numbers reported by HHS through Feb. 1 for the federal exchanges and numbers reported by 14 states and the District of Columbia as of Feb. 25 for the state exchanges.
Source: HHS

3 Number of ambulatory surgery patients out of every 1,000 who were treated for a surgical-site infection requiring hospitalization within 14 days after an operation
—Agency for Healthcare Research and Quality

32%

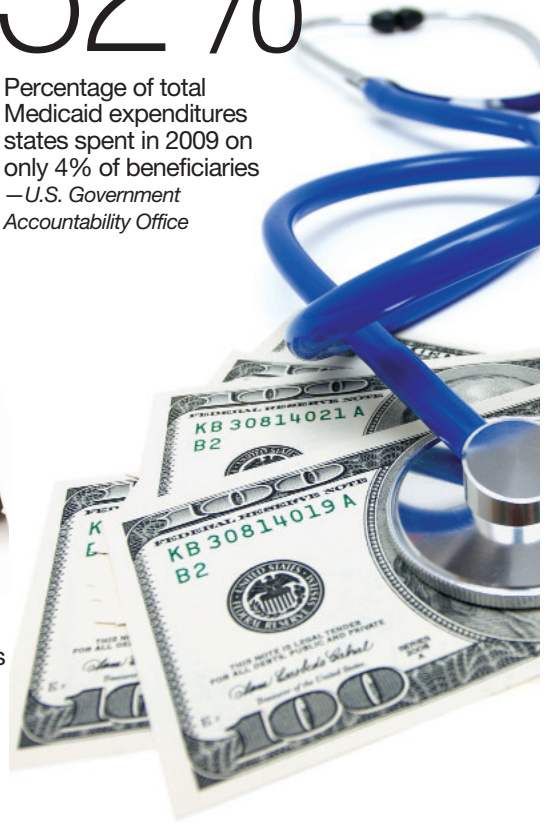

Percentage of total Medicaid expenditures states spent in 2009 on only 4% of beneficiaries
—U.S. Government
Accountability Office

1/2

Share of 200 healthcare providers that reported being 25% or less finished with their ICD-10 conversion process, compared with 75% in 2013 that reported being at that stage
—Healthcare marketing firm Aloft Group

Number of U.S. healthcare organizations compromised by cyberattacks between September 2012 and October 2013
—The SANS Institute

14%

Percentage greater likelihood of insured, severely injured patients at hospitals that aren't trauma centers being admitted there rather than being transferred to a trauma center compared with uninsured patients, indicating suboptimal care for the insured patients
—JAMA Surgery
